

[SCHOOL DISTRICT NAME] PRESENTS:

APOLLO AFTER SCHOOL!

ENROLL
NOW

Safe, enriching, and exciting programs
for curious young minds.

Why Families Love Apollo After School

Apollo After School offers a safe, fun, and enriching environment for children after the school day. Our caring and qualified instructors lead hands-on activities, academic support, and exciting clubs that spark creativity, learning, and confidence.

In partnership with families, Apollo will be selecting exciting enrichments from the many daily clubs we offer throughout the year:

ART CLUB

In Arts & Crafts Club, young Apollo students will learn many techniques to turn their ideas into reality under the guidance of our Apollo staff. Club members will use their creativity and imagination to make many objects for gifts and decorations.

YOUNG EXPLORERS

Students will learn about mysterious rainforests, towering mountains, sweltering volcanoes, exotic cultures, and many other wonders this amazing planet has to offer!

BASKETBALL

The children are taken through various exercises, drills, and games to improve their basketball skills. This training is good for players of all levels.

APOLLO CHEFS

Cooking is one of the most important and rewarding life skills a child can learn! We teach our students kitchen and equipment safety, safe food handling, and food presentation.

SPORT GAMES

Zumba! Yoga! Dancing! These easy fitness activities for kids make exercise so much fun that your children won't notice they're working out. When you motivate children to exercise, they will be happier, healthier, and more focused!

MATH CLUB

Math is fun - we're not just saying that, let us show you! Our math enrichment club uses a variety of games and hands-on activities to help improve our students' understanding of this critically important subject.

SCIENCE CLUB

Students in Apollo Science will learn how to ask the questions that are the beginning of all scientific discoveries, how to make hypotheses, and of course the fun part - testing them to see how they work.

YOGA

A fun and exciting way to either introduce new students to yoga, or continue to foster an interest in those that are familiar with it.

BOARD GAMES CLUB

Whether in games of chance or games of skill, board games are an incredible source of fun, social interaction, and mental activity. Students in this club will play many of their favorite board games, and even learn some new ones to teach their parents.

APOLLO BUILDERS

In our club, your child will learn many basic building techniques and will be encouraged to put their imaginations and hands to work in making their ideas turn into reality.

ENTREPRENEURSHIP

In Apollo Enterprises, our students will learn how to think constructively about their own cool ideas for creating value, practice some of the steps for making them a reality, and learn about what it takes to keep their young businesses running.

DANCE

Your child will learn a wide-range of dance techniques from hip-hop to jazz to choreography, taught by professional dancers. No matter your skill level, this class will get you dancing!

CIVICS

No one just grows up and becomes a participating citizen of our American constitutional republic. Just like any right, skill or responsibility, it takes a combination of education and practice to fully participate in our civic society. Students will learn about local, state, and federal government, how to investigate and form their own opinions on issues that matter to them, and participate in their own debates and class elections.

STORY TELLERS

While it may seem like everywhere your child turns there is a touch-screen calling to them, there is still nothing that opens up the world of imagination and possibility like a good book. By reading both quietly and out loud, Book Club students will greatly improve their ability to determine meaning from the written word along with public speaking skills and listening skills. Watch your child discover more about their world through a book - great readers often become great thinkers!

SOCCER

Our program allows young players to learn and enjoy soccer in a positive and fun environment. We provide a healthy activity through teaching the right technical soccer skills and we make sure the games that the players play are relevant to their skill levels.

CODING -ANIMATION

Your child will dive into computer science and software engineering through fun block programming, creating captivating animations with newfound coding skills.

CHESS CLUB

We will provide fun, informative and challenging chess lessons to students. Students will be divided into groups according to their chess experience. At the end of this session, each student will have had the chance to participate in a mini-tournament.

WEB DESIGN

Many people would be surprised if you told them that designing websites nowadays is so easy, a child can do it. Today there are so many tools available which make web design easy, kids aren't the only ones who can do it... soon they will be teaching their parents as well! Children enrolled in this class will create their own website and will be able to show it off to their friends and family.

STEM ENGINEERING

Your child will dive into the realms of science, technology, engineering, and math with LEGO kits! Let their imagination run wild as they design structures, machines, and vehicles. They'll sharpen their problem-solving abilities through thrilling STEM adventures that make learning an enjoyable experience.

EXTENDED TIME FOR EXPANDING MINDS!

Apollo After School inspires children to become lifelong learners through a safe, fun environment and a unique blend of physical, intellectual, and social activities.
